**“Harnessing the Potential
of present and future Carbon Markets”**

AUSTRIAN JI/CDM WORKSHOP 2010

Vienna, 28 to 29 January 2010

PROGRAMME

INTRODUCING THE EVENT

The Austrian JI/CDM Workshop is the annual event organized by the Austrian JI/CDM Programme, which aims at bringing together a variety of stakeholders of the international climate and carbon community. Its strategic timing – right after the Conference of the Parties – as well as the contributing high-level speakers have been key components for maintaining its attractiveness, providing an effective communication platform for international experts in a friendly atmosphere and a nice setting.

The focus of the forthcoming sixth Austrian JI/CDM event will be on:

- **COP 15 in Copenhagen**, the global climate event awaited by all climate professionals, due to its implications on the future climate regime and carbon market, and
- **recent and future developments of the international carbon market** and flexible mechanisms under the Kyoto Protocol, involving national and international authorities, financial institutions, designated operational entities, project developers and other key players.

INFORMATION ON THE WORKSHOP

For any information regarding the event, the organising team is happy to assist you:

Mr. Martin Gauss
Mrs. Bianca Gusenbauer
Mrs. Sabine Schöller
